The International College of Seville (ICS) recognizes the increasing importance of participating in community social services and would like to improve the access to community work that we already have been providing to our students on an informal basis for some years.

We normally check with NGOs every two weeks to verify the progress of our students. We ask the students to write a four-page report on the work they have developed and ask the NGO for a certification of compliance at the end of the community service period. Students could also receive credit for the work done. This could be of great interest to those students who are studying Special Education or similar degrees.

Through Fundación Prodean we have arranged the following volunteering opportunities:

1. Working at children's ward at local public hospital.
Atención al Ciberaula / Servicio de Canguro y Respiro Familiar.
